

THE SACRED DUTY OF PROTECTING THE HOMELAND

Ruzibaev Mansurbek Sobirovich

Teacher of military education faculty of

Fergana state university

Abstract:

how glorious is the duty of the motherland in this article is about the visions that protect outlined.

Keywords: land, holy, worship, native soil.

Introduction

Our country is huge and we are here today we're on the eve of the feast of particular importance for us, this holiday over many years, is widely celebrated in the land. 1993 29-January 14 since December the date of "day of defenders of the motherland day as established by the president. Coming to the realization of selfless soldiers actually a huge task as homeland protection seem to show how much respect is too small. The head of state also faithful to this idea out without the rest of a wide range of work, including the military given many benefits to military families, both equally for the children profit-bearing work has been done, to date, participated in world war ii on may 9 of each year veteran at a great value gift-gifts greetings being low interests loans for the military, military service benefits while it will be for those who take an example. The president encouraged young people to be the patriots, has the following words: "o glorious of uzbekistan of the younger generation! In this life, pursuing your dreams, your purpose, that a lot of your work. But never forget of you, the most great, the most holy task - independence of the country, the freedom of our people the freedom and the preservation of the apple of my eye, is the protection of its security". Homeland protection of this honorable duty. Land protection in the way of showing the courage of our forefathers for us to be a sign of great heroism will serve our country, our affection increases.

This country we were born, we are grown go'sha, umbilical cord blood shed our soil, we find that growing is a holy place. We are left to the great legacy that generations ajdodlardan it dear and the memory. The prosperity of the motherland, the country the priceless blessings of peace, glorious is bliss. Mankind in all stages of its development from ancient times, first of all, it comes from striving for peace and harmony. In development where there is peace, peace of mind and for this reason is also freedom, independence and we should keep our eyes qorachiq. Bringing up young people in the spirit of patriotism, the duties and obligations of legal standing in front of

them from the side of the family also have to know is the task of society on delivery. In particular, the motherland of man will be presented with a sense of pride-of pride and a high target-muddaosi as it is clear. Man in him the love of the motherland mother's milk, mother, alla, the parents went to soak in the mercy of being with. The holy soil of the motherland, for this reason, the soil of the land of our ancestors who to'tiyo to the eye wherever you go, the country is yodi breathed. Ayro mold of a man from the motherland was unable to ever achieve happiness in his heart kemtik as it seems, in their own country too qadrlanmaydi in a strange land without authority. We also served our country as seen from this aspect also all the people that are closely related. "Iymondandir infuse the love of the motherland" was that wise, we have most of us heard the phrase, this word meaning is at the heart of how to lay it and, who knows, what can I say? Bless our prophet and Messenger sollallohu vasallam also love to put which illustrates the country's cases have been reported. That's one of them: s messenger.a.select v cast out from mecca Mecca say goodbye to the folk at him, those who spoke so: "how good you are when the city, how the shops have suyuklisi! Qavmim you then send out to you from me, and you live boshqada" Imam Termizi reported. Considering the description of the motherland and a little about how we now return to our main theme, we will.

Long years from the period of colonization to independence square and their policy out our previous state, system, and the economy of the re-organization was. Huddiki this period from the first steps to put the new-born baby steps and bright this life as only himself to erect a difficulty to keep checking our independence is taking up much more from the early days of the country we passed with strengthening the defense have been identified as one of the top priorities of government policy. If the army military construction embodies the most advanced experiences in our world, at the same time, with high loyalty to our national martial tradition continues. Today's young are the guards of our country independent. We are representatives of the younger generation is perfect, we have brought up mature men, one or each of them-cheers, consistent, we have to go explain the formation of national pride, our motherland will become so powerful state. Over the past period, wide-ranging reforms due to the safety of our country, that are reliable immunity to protect the frontiers, peaceful and restful g'araz to prevent a war directed against the life of any of our population who is able, compact, agile, perfect from the organizational aspect, we are supplied with modern weapons and military equipment the national army shakillantirildi. Our power is in the leading place in our country on the world community to the army, of course, is the great privilege of this country. These results not only with the quality and amount of armor, the soldiers of our military strong combat skills, great experience, and with the price of another in its place shijoatkor abjir "eye tegmasin" we will tell the rest. Incomparable native of the place, help each country to face the ignorance of the military in place, and also for peace was our pleasure, our well-being and development of all of our freedoms that are directed to ensure that you have all of our of our country are guards.

Its backbone is a young country, and the army of suyanch. Contrary to the above words we say, we are all additional noteworthy for their contribution to the development of our country, we can make peace, while the more accurate our spiritual words legal how high internal attacks our minds, none of us own spiritual buzmakorlik domiga can't pull the idea. G'araz with the purpose of causative single attack and internal war internal fights weakened the purpose of the flow ya'nikim himself with his country would wait to the conquest of our spiritual zaxarlashdir it in the first place. The right to be army strong the country is very important, but the people's minds to be too strong bundanda is important. Many of my own thoughts in the same place - I was too add my review accepted it and get to know everyone's own life that is implemented in hand. Roof army

worthwhile to a lot of our praise we our military power in the world community can be proud of the leadership position, we can say with pride. Defenders of the land, the door of the house I don't care. Checking qiziqyapsizmi why is the door? The house is entered into through the door and out of the house if the door is that we do not, the changes are targeted too bad of one, a thief-also labeling it into the house for ost-column and such that will make you never doubt in the case of the man who lived and will not live in a house kongli is pleasure in himself, not protected free and is unable even any people can destroy it. The role of military power that could not pay in our lives mean nothing, it's our pleasure, our freedom our peace, our security would be in their hands?

The conclusion of the issue is the power of influence the minds of the young generation. Not only the military, but also the whole society will contribute in the protection of the population of the country, even we can know the thoughts mentioned above . Guards of the land is cold, is hot, the night is day the people always focusing on service, their peaceful and restful services necessary for our day, our heaven filtering. The military is responsible for their own profession, they understand that all of what is in the case that put their own life at risk, but also far from his family and work are held in almost every position concerned with damini, this is also hard bisyor out the code of your profession and everyone can't servicemen of the profession. Unceasing risk at any time to be ready to do the labor themselves, offered structure, from the owner, as opposed to many professional is in the bosom of the family, almost will not. This issue is difficult sanayversak you again adoqlash account. Many young children will say that I have a large military, military as they strong-be strong, to think, to form admiration wearing them do, that they will bear in the future I will make more heroic heart. But the younger generation who appear in them the feeling of the motherland, love of the profession for the future is very advantageous. The military of the country in the hands of many adversaries can be broken, especially not in the eyes of the young love to the motherland unlimited extinguished the fire no one shining can't. Defenders of our motherland on the holiday we will stay with the coming of hospitality, they never sinmasliklarini life in the way of mercy to the land of never was extinguished, whether in power can't break down no one ankle at a level that would be reached that can justify their profession and wish them great of the sons of the motherland, our country has always peace, filtering of heaven, our, our happinesswill never eye tegmasin!!!
